

A close-up photograph of a worker in winter safety gear. The worker is wearing a white hard hat, dark safety glasses, and a black hooded jacket with a bright orange high-visibility vest over it. They are wearing blue and black work gloves and are holding a large metal pipe. The background is a snowy industrial site with various pipes and structures. The overall scene is set in a cold, snowy environment.

PIP

COLD

CLIMATE PROTECTION

www.pipusa.com

Cold climate hazards impact millions of workers.

These hazards are not only caused by weather but also by refrigeration of cold storage facilities. In these environments, workers must wear proper protective equipment to regulate body temperature and to remain productive.

It's important to understand that even a slight drop in body temperature (3-4°F) can lead to hypothermia when your body loses heat faster than it can produce heat. Hypothermia can inhibit the functions of vital organs such as the heart, leading to exhaustion, memory loss and fumbling hands, all of which increase the risk level of any job site.

For workers in cold climates, wearing insulated PPE is critical to maintaining proper body temperature. For certain types of PPE, the addition of insulation can often hinder performance with its added bulk. Through innovative design and technology, PIP® offers cold climate protection that keeps workers warm, safe and able to perform at their best.

Insulated Coated Seamless Knit

Construction / Transportation / Railway /
Mining / Warehousing / Cold Storage / Oil & Gas

A5

41-8035

- Single-layer construction provides excellent dexterity
- Full hand coverage keeps hands warm and dry

A4

41-8014

- Single-layer construction provides excellent dexterity
- Coating provides excellent abrasion resistance and a good grip in dry and slightly oily conditions

Winter Caps & Liners

Dual layer

Mesh inside

▲ 364-1195

PIP® Thermal Exo Balaclava

- Dual-layer balaclava provides form-fitting comfort and protection from extreme weather conditions sealing out the cold, wind and snow
- Harnesses heat from the sun's powerful solar rays to create an exothermic warming effect, intensifying the warming effect of the material up to 15° F (10°C)
- Soft, breathable mesh inner layer
- Wear as a neck gaiter or a full-face mask
- Lightweight fabric fits comfortably under a hard hat or helmet

▲ 364-1180

PIP® Value Winter Balaclava

- Protective wind-resistant fabric provides form-fitting comfort and protection from extreme weather conditions
- Soft, breathable mesh inner layer
- Can be worn in multiple ways: open face balaclava, neck gaiter or full-face mask
- Lightweight fabric fits comfortably under a hard hat or helmet
- Flexible material will stretch to fit most head sizes
- Machine washable

FR Treated/Self-Extinguishing (Outer Shells Only):

Outer shell tested to retain their FR characteristics for 1, 10, or 30 washes.

Non-FR:

Hats, caps and a few select winter liners are not treated for use in applications that do not require the added protection.
